Continuation of Disposition of Claims: Claims pending in the application are 531,533-537,539,541-556,558,560,563-609,5396,5397,5400-5403 and 5529-5616.

Art Unit: 3672

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claim 5532 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5529 requires the heating rate to be "less than about 10C per day", while claim 5532, which depends from this claim, calls for a heating rate of "about 100C/day". Claim 55 is both indefinite and comprises an improper dependent claim in calling for a heating rate outside the range of their parent claim. In this regard, a dependent claim must include all the features of the parent claim, and then specify an additional limitation.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 531, 533-537, 539, 541-556, 558, 560, 563-609, 5396, 5397, 5400-5403 and 5529-5616 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over copending applications (including the present application):

Claims 531, 533-537, 539, 541-556, 558, 560, 563-609, 5396, 5397, 5400-5403 and 5529-5616 are specifically provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 531-556 and 558-609 of copending Application No. 09/841,430. Although the conflicting claims are not identical, they are not patentably distinct from each other because the hydrocarbon-containing formation treated by the method of claim 531 and 570 of this pending application is deemed broad enough to encompass or comprise the coal formation of claim 531 and 570 of the copending application. Otherwise, the remaining claims of both this and the copending application appear to correspond, with the additional limitation in claims 5396 and 5397 to 20 heat sources per recovery well deemed an obvious matter of choice or design based on, e.g., the characteristics, properties and/or areal extent of particular hydrocarbon formation encountered in the field.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
